ANTONIO JOSÉ LOJO OJEDA

Android Development

Android Developer
Technician in Web Application development
Technician in Microcomputer System and networks

I introduce myself as a **web developer and Android developer**. I present qualities in both technologies and I am qualified to carry out both specialties. As a web developer I have been trained thanks to my studies and qualification as **"Higher Technician in Web Development"**. As an **android developer** I have trained during an **intensive 3-month course at the SDOS company and have worked from June 2021 to the present as an Android developer**, working mainly on two projects **"El Diario AS"** and **"ZARA"**. I also have knowledge and skills in Linux using bash and apt, operating systems, networks and office automation thanks to my studies and degree as **"Technician in Microcomputing Systems and Networks".**

Skills

Design	Front (HTML 5, CSS3, JS, React)
>>>>>>>>>>>>>>>>>>>>	>>>>>>>>>>>>>>>>>>>
Android Specialist	Back (Flask, Django, Spring)
>>>>>>>>>>>>>>>>>>>>>>	>>>>>>>>>>>>>>>>>>
Office Suites	Unix SO (Debian, Ubuntu, Mac os)
>>>>>>>>>>>>>>>>>>>>	>>>>>>>>>>>>>>>>
English	System Administrator (WS, US, debian)
>>>>>>>>>>>>>>>>>>>	>>>>>>>>>>>>>>>>

Work Experience

Bernardino Abad
Technician in Microcomputer System and networks.   *2019*

- Maintenance, repair and installation of computer equipment
- Domain and network administration
- Maintenance of their website
- Personalized remote assistance
- Instructor in course internal training of office tools

ALTEN/SDOS
Android Front-end developer.   *2021 - 2022*

- Front-end Android developer
- Architecture migrations MVP – MVVM
- Dagger for dependencies inject
- Kotlin Flow, Coroutines, recycler views, viewBinding …
- Model layers architecture (DTO, BO, VO ,DBO)
- Working for *"El Diario AS"*.

NAPPTILUS
Android Front-end developer.   *2022 - Act*

- Front-end Android developer
- Design patterns (MVP - MVVM),
- Legacy Code in Java migration to Kotlin (java to kotlin, RX Java and Async Tasks to coroutines …)
- CustomsViews and advanced programming in the Android framework to achieve special functions in Zara App,
- agile methodology (Kanban and Sprint)
- Koin for dependencies inject
- Kotlin Flow, Corrutinas, recycler views, viewBinding …
- Working for *"Zara"*.

Education

Technician in Microcomputer System and networks
Office Tools, Networks, Linux, Servers, Web, BBDD, Security.   *2017-2019*

- assembly, maintenance of computer equipment and administration of operating systems (Windows, Debian)
- Bash domain and windows terminal
- installation and maintenance of local networks (Cisco Packet Tracer, and Debian services)
- Basic web development (HTML5, CSS3, Wordpress, Joomla)
- Basic notions in databases (MySQL)
- Notions in Informatic security
- Office Tools (Microsoft and Google Suites)
